Pragati M Suryavanshi

1st year Electronics and communication Student at KLS GIT College
Belagavi, Karnataka, India

Summary

I am an Electronics and Communication Engineering (ECE) student from Karnataka with a strong analytical mindset and a passion for technology-driven problem solving. I have built a solid foundation in mathematics and logical reasoning through consistent practice and structured learning. My technical interests lie at the intersection of electronics and software, where I explore how communication systems integrate with modern computing technologies. I am skilled in Python programming and C++, and I actively use these languages to strengthen my problem-solving abilities and develop practical solutions. I also have a creative edge with experience in visual effects, allowing me to approach technology with both analytical and design-oriented thinking. I am continuously working on expanding my skill set through hands-on projects, learning new tools, and exploring emerging technologies. I am particularly interested in applying my knowledge to real-world challenges, gaining practical experience, and building impactful solutions. I value discipline, consistency, and continuous improvement, and I am always open to opportunities that help me grow as a tech professional.

Education

Gogte Institute of Technology, Belgaum

Bachelor of Engineering, electronics and communication · (September 2025)
